CHOCOLATE KAVA/HOODIA COMPOTE: Our food chemist just cannot seem to stop producing healthy new easy to use Kava/Hoodia based delicacies! The belief that there is an herb for every human condition is manifested by the bountiful benefits of this creation with pure cocoa beans, fresh fruits, organic Kava enriched with Hoodia Gordonii.

This latest addition to our growing line of unique Kava products is a version of the famous central European dessert, 'fruit compote' traditionally made by baking or stewing no less than 12 fruits! The idea was to make it as rich as possible so that a little would go a long way, to be able to eat some fruit during the harsh winter months.

We decided to use the theory of a little goes a long way, but also to enrich our compote with ingredients that ensured nourishing wellness for both body and mind.

Carefully made to contain the traditional 12 items we used organic red grapes, oranges, pineapple, tomato, strawberry, raspberry, ginger, honey, soy lecithin, cocoa, kava and the herbal supplement Stevia. We also added oils of almond, sunflower and vanilla extracts. The reason for using oils is because some of the active ingredients (Kavalactones) of Kava (there are six major lactones known to provide psychoactive activity) are water soluble, and others are soluble only in oil. Just a little does go a long way to help calm your spirit and benefit your body.

You can add this compote to any dessert or gently heat if needed (high temperatures destroy kavalactones and solidify chocolate) and add to any fruit drink for a deliciously nourishing peaceful experience.
